

UAT Stories for Dining Reservations Component

UAT Story 1: Add a Dining Reservation

Title: Verify that a user can add a dining reservation

Acceptance Criteria:

- Given the user is authenticated,
- When the user selects a dining date and time,
- And submits the reservation details,
- Then the reservation should be successfully saved,
- And the user should see a success message confirming the reservation.

Test Steps:

1. Log in as a user.
2. Navigate to the Dining Reservations component.
3. Select a date, time, and party size for the reservation.
4. Click 'Add Reservation.'
5. Verify that a success message appears.
6. Verify that the new reservation is displayed under 'My Reservations.'

UAT Story 2: Edit a Dining Reservation

Title: Verify that a user can update an existing dining reservation

Acceptance Criteria:

- Given the user is authenticated and has an existing reservation,
- When the user updates the reservation (e.g., changes the date, time, or party size),
- And submits the updated reservation,
- Then the system should update the reservation and display a success message.

Test Steps:

1. Log in as a user with an existing reservation.
2. Navigate to the 'My Reservations' section.
3. Click the 'Edit' button on the reservation.
4. Change the reservation details (e.g., date, time, party size).
5. Click 'Update Reservation.'
6. Verify that the system updates the reservation and shows a success message.
7. Confirm that the updated reservation details are displayed.

UAT Story 3: Delete a Dining Reservation

Title: Verify that a user can delete a dining reservation

Acceptance Criteria:

- Given the user is authenticated and has an existing reservation,
- When the user clicks 'Delete' for their reservation,
- Then the system should prompt the user for confirmation,
- And upon confirmation, the reservation should be deleted,
- And the user should see a success message confirming the deletion.

Test Steps:

1. Log in as a user with an existing reservation.
2. Navigate to the 'My Reservations' section.
3. Click the 'Delete' button on the reservation.
4. Confirm the deletion when prompted.
5. Verify that the system deletes the reservation and displays a success message.
6. Confirm that the reservation is no longer displayed.

UAT Story 4: View Dining Reservations

Title: Verify that a user can view their reservations

Acceptance Criteria:

- Given the user is authenticated,

- When the user navigates to the Dining Reservations component,
- Then the system should display a list of the user's upcoming reservations.

Test Steps:

1. Log in as a user with multiple upcoming reservations.
2. Navigate to the Dining Reservations component.
3. Verify that the user's upcoming reservations are listed.

UAT Story 5: Validate Reservation Input

Title: Verify that the system validates reservation input fields

Acceptance Criteria:

- Given the user is adding or editing a dining reservation,
- When the user leaves required fields (e.g., date, time, party size) blank or enters invalid data,
- Then the system should display an error message,
- And prevent the reservation from being saved.

Test Steps:

1. Log in as a user.
2. Navigate to the Dining Reservations component.
3. Attempt to add or edit a reservation but leave required fields (e.g., date or time) blank or enter invalid data (e.g., party size of 0).
4. Verify that the system displays an error message.
5. Correct the invalid input and submit the reservation.
6. Verify that the reservation is saved successfully with valid input.
